Don't like all the sounds? There are a number of options. You can choose to turn ALL off, or just a few.
You can also turn off all voice sounds by clicking Settings/Voice Settings.

Customise Your Board

Change the frame texture. Change the colours of your checkers, points, dice, cube. Just about everything can be changed to your liking.

No Undo Button?

If the "undo" button is missing from the middle of the board, hit control+Z to undo. The first time you try Ctrl-Z may prompt a question to enable shortcuts, which you should answer with a Yes.

Resign Game/Match

You can resign a game or a match by clicking on your own score over at the side. It will give a popup on how you want to resign (single, gammon, backgammon, match). There's an "X" to change your mind before committing to the resignation. You can also choose Menu/Resign.

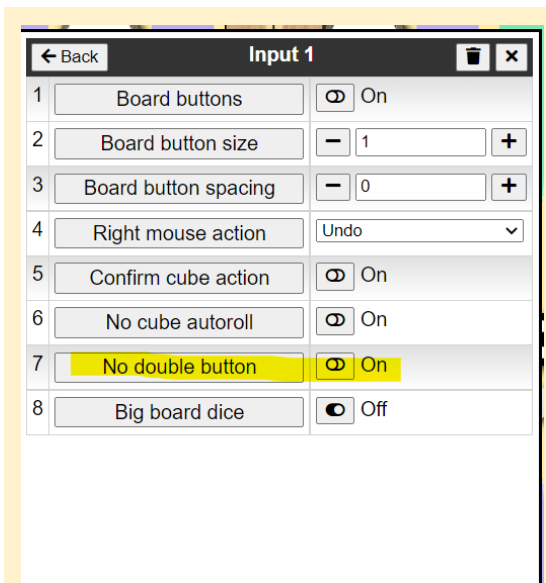

No Double Button?

If the cube is available there is normally a double button, but you can also double by clicking on the actual cube.

Reverse Dice

Click the dice to reverse them. For example, you roll a 6-1, but you want to play the 1 first.

Remove Double Button

The double button is right next to the roll dice button. Some people may accidentally hit double when rolling. To turn this off, go to Settings/Board Settings/Input 1.

NOTE: To choose NO Double option, you must turn this feature ON.

Disable Make Points

This option allows you to click on an area of the point to auto move your checker. Some like it, some not.

NOTE: To turn this feature off, you must turn it ON to DISABLE.
